

Studio Pod ★ Style Guide

What should I wear?

Putting an outfit together for a headshot is harder than it should be. Let's simplify it.

Hair prep

Have your hair cut and styled the way you want it captured. The pod photographs what's in front of it.

Trim beards the morning of, and bring a brush or comb. A few seconds before you sit down is usually all it takes.

Wardrobe

Bring a couple of options if you want variety from one session. Solid, mid-to-dark colours photograph best.

Avoid tight patterns and large logos. They shimmer or date the photo. Keep jewellery simple, and clean your glasses beforehand.

Think about where the photo will be used, and dress for that room.

Makeup

The common advice is to have it done professionally. Our take: do whatever makes you feel confident and comfortable.

Yourself, a friend, or an artist all work. The lighting is built to be kind either way.

That's it.

Wear what you'd wear on a good day at work, and the pod will do the rest. See you in there.
